STATE UNIVERSITY

Stephen Kane

UNIVERSITY OF CALIFORNIA
UCRIVERSIDE

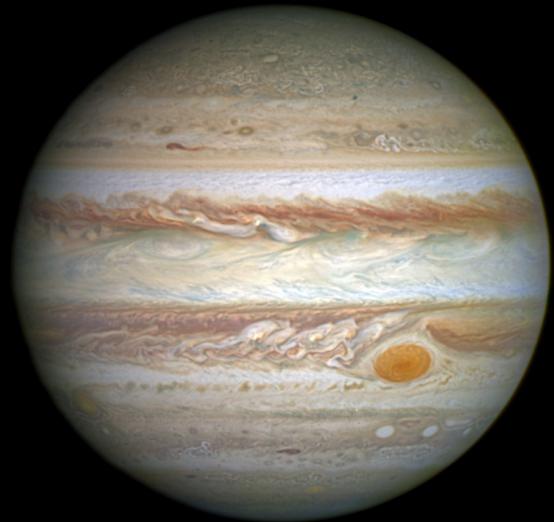

**I'M TIDALLY LOCKED AROUND AN
INTRINSICALLY FAINT STAR AND AM
REGULARLY PUMPED FULL OF XUV RADIATION**

**BUT I'M IN THE HABITABLE ZONE, SO
I GOT THAT GOIN FOR ME, WHICH IS NICE.**

Gillon et al. 2017, Nature, 542, 456
Luger et al. 2017, NatAs, 1, 129

Jupiter

Semi-major axis ~5 AU

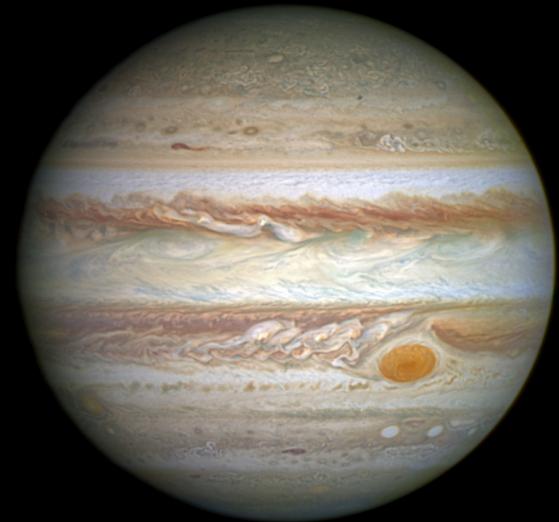

Hill radius ~ 50 million kms

Ganymede

~ 1 million kms

Jupiter

Semi-major axis ~5 AU

Hill radius ~ 50 million kms

Ganymede

Hot Jupiter

Semi-major axis ~0.05 AU

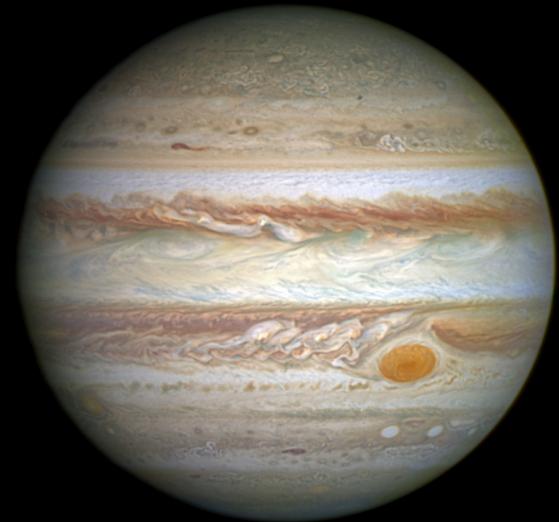

Hill radius ~ 0.5 million kms

Not
Ganymede

~ 1 million kms

Jupiter

Semi-major axis ~5 AU

Hill radius ~ 50 million kms

Ganymede

Hot Jupiter

Semi-major axis ~0.05 AU

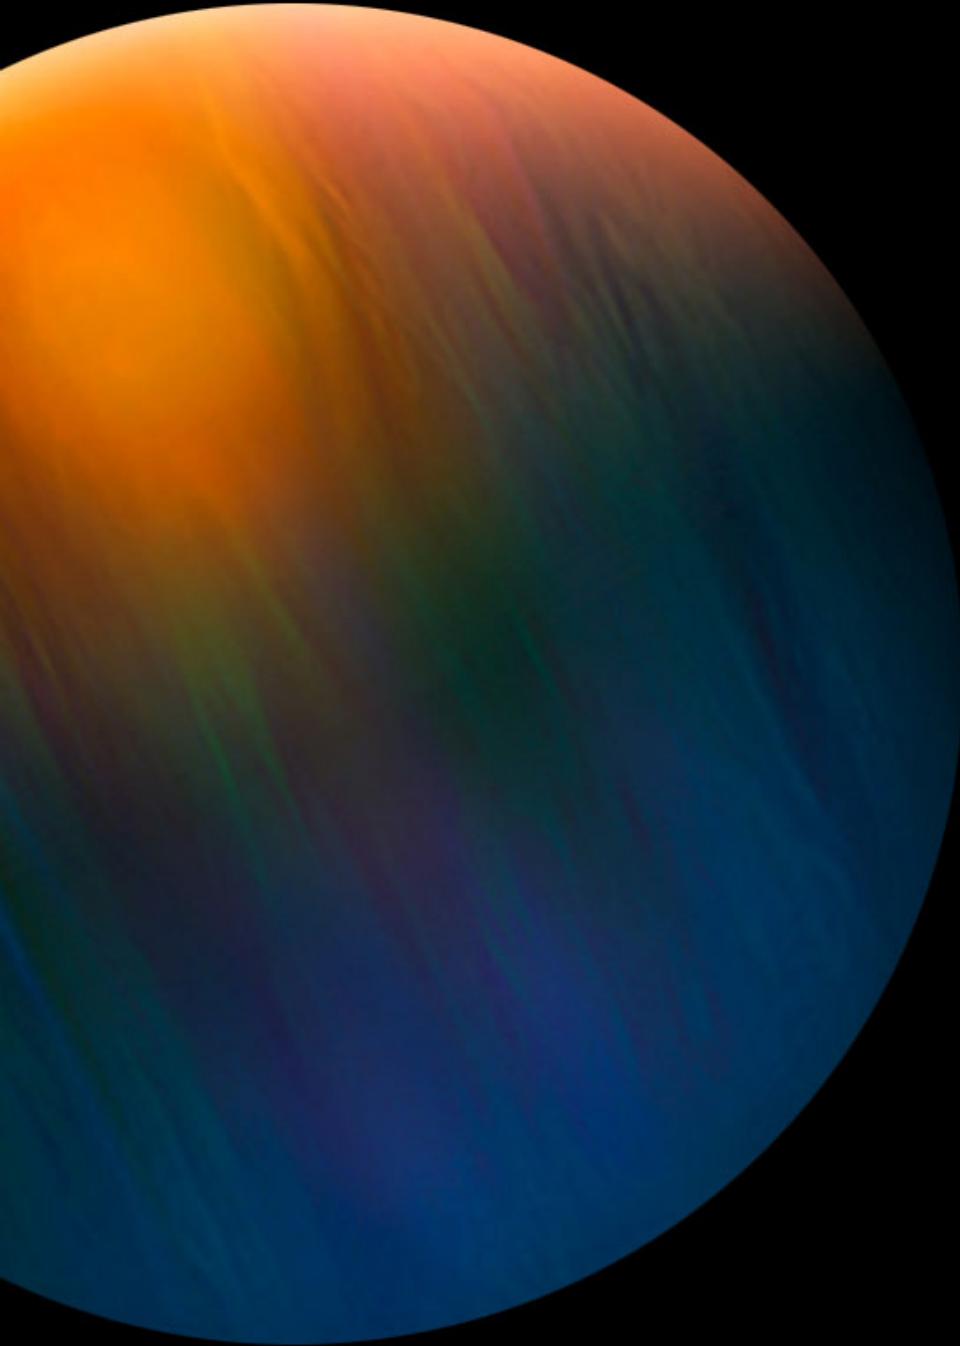

Hill radius ~ 0.5 million kms

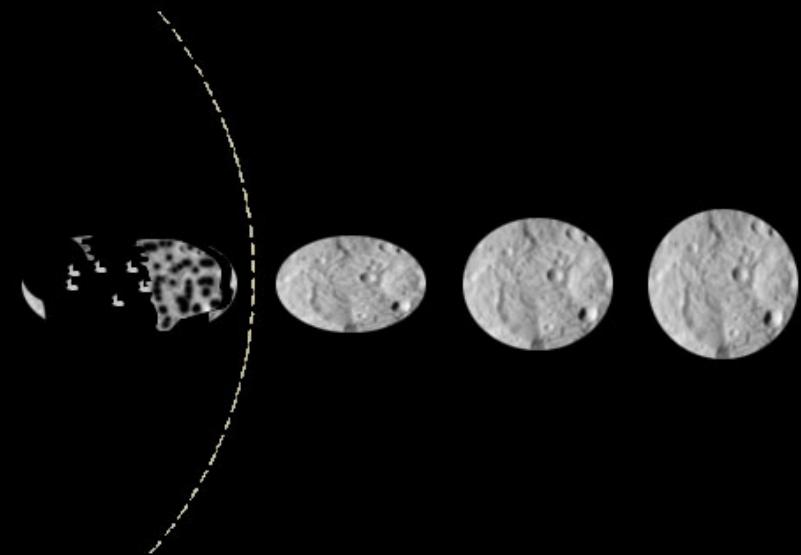

Not
Ganymede

~ 1 million kms

Studying Planetary Atmospheres

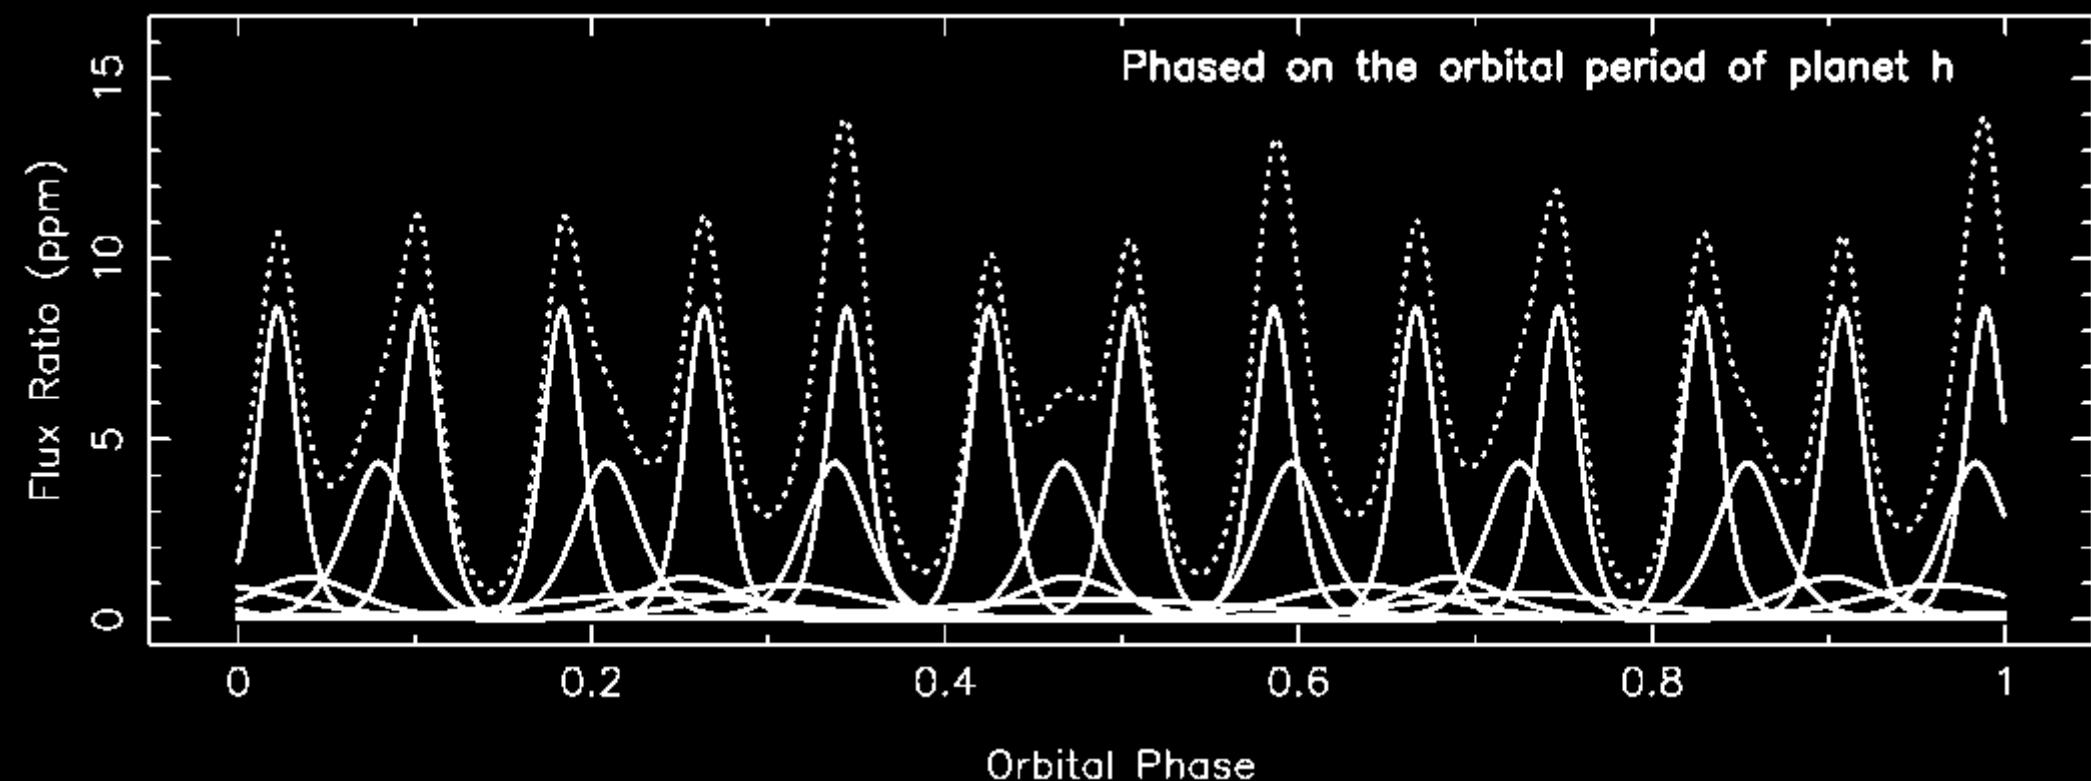

$$\text{phase amplitude} \propto \text{albedo} \times \left(\frac{\text{planet radius}}{\text{semimajor axis}} \right)^2$$

TRAPPIST-1

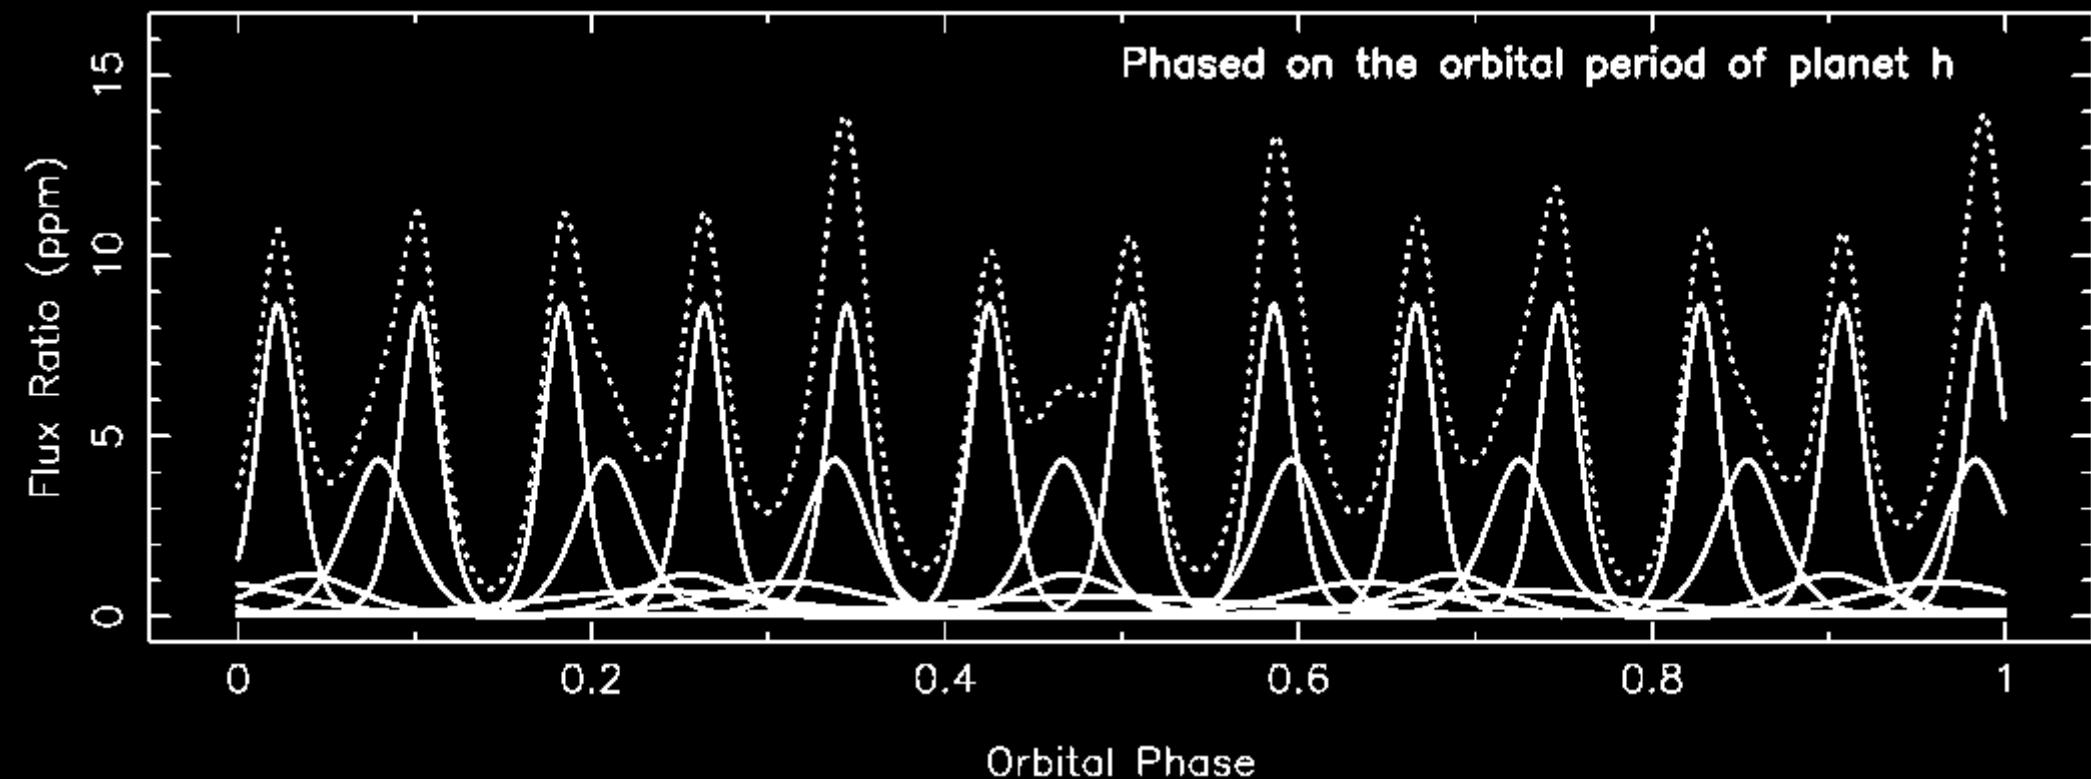

TRAPPIST-1

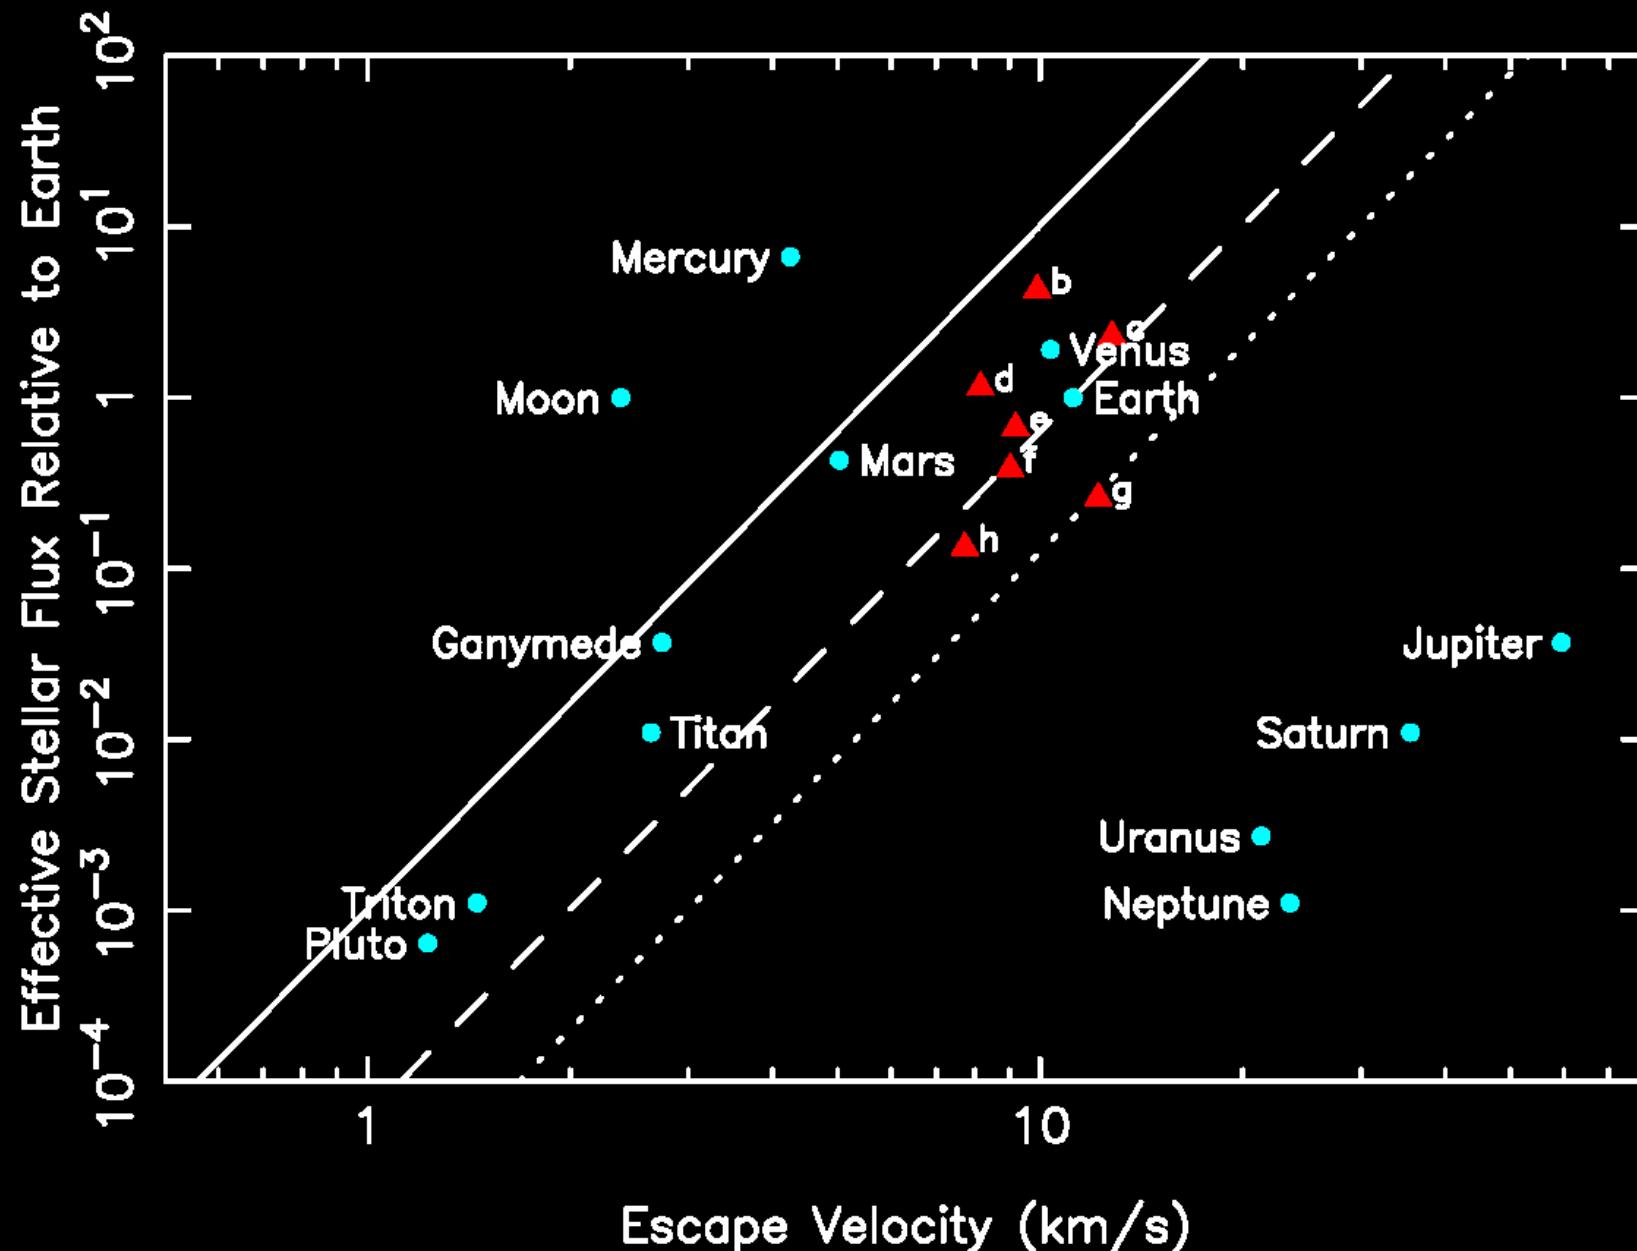

Surface conditions dependent

TRAPPIST-1

Surface conditions = rocky?
atmosphere?
molten?

The Cosmic Shoreline

Detection

- Transits
- Radial velocities
- Microlensing
- Imaging
- Observing strategies

Characterization

- Eccentricity
- Atmospheres
- Orbital stability
- Multiplicity
- Statistics

Habitability

- Habitable Zones
- Venus analogs
- Obliquity & eccentricity
- Atmospheric signatures
- Volcanic activity
- Target selection
